

Math Start, based on the CUNY Start math program, is an innovative CUNY program that helps associate degree-seeking students get a **Strong Start** in College. In a collaborative, student-centered learning environment, students increase their understanding of math, prepare for college-level coursework, and are able to meet CUNY’s math proficiency milestone in only 8 weeks.*

Math Start will offer only online classes in summer 2021

To join summer Math Start, students need the following:

- Have earned a high school or high school equivalency diploma
- Completed all [CUNY admissions](#) requirements
- Required to take a math intervention before attending a college-level math course**
- Able to commit to the academic schedule and to actively participate in online classes

You have a team behind you!

Our teachers, advisors and tutors are here to help you succeed and prepare for college-credit math courses by fall.

Committed, specially-trained teachers

Instructors have been specially trained to help you reach your math proficiency milestones by providing full-class online instruction, as well as group and individual support for your learning each day of summer class.

Designated advisor

As a Math Start student, you have a designated advisor to help support you through the college planning process. Your advisor also teaches three-to-five online, academic success seminars to help you prepare for entering CUNY in the fall and is available for individual support. Advisors can help answer questions about financial aid, course registration, and other non-academic supports.

Low cost to students

Students pay \$35 (all fees include materials), and preserve their tuition and financial aid dollars for credit courses that count towards their degree.

Well-defined pathway to ASAP

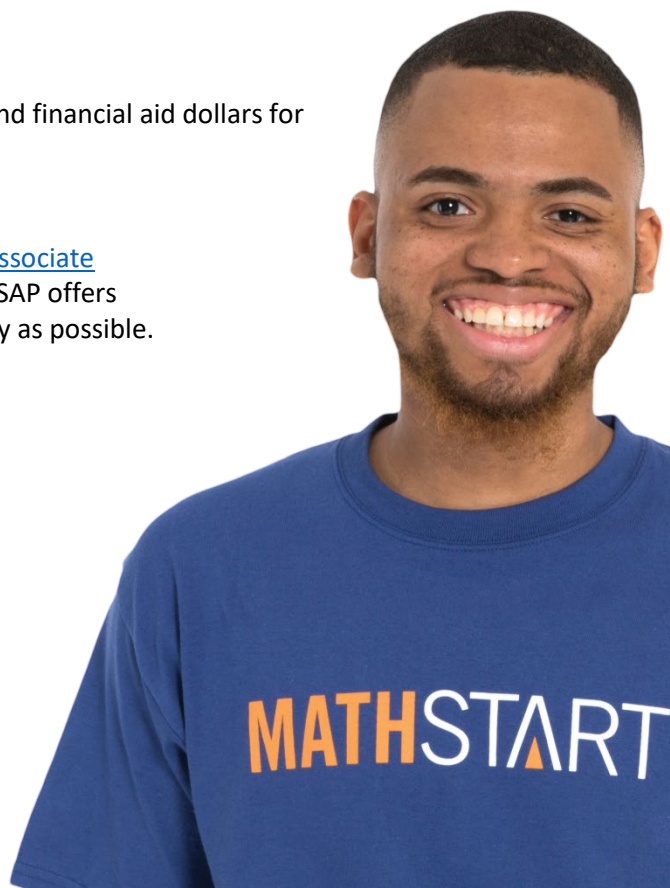

Math Start advisors can help you enroll in [CUNY’s Accelerated Study in Associate Programs \(ASAP\)](#) for students who intend to enroll in college full-time. ASAP offers benefits designed to help students earn their associate degrees as quickly as possible.

For more information, contact the Math Start program at your college

Borough of Manhattan Community College	MathStart@bmcc.cuny.edu
Bronx Community College	MathStart@bcc.cuny.edu
College of Staten Island	MathStart@csi.cuny.edu
Guttman Community College	MathStart@guttman.cuny.edu
Hostos Community College	MathStart@hostos.cuny.edu
Kingsborough Community College	MathStart@kbcc.cuny.edu
LaGuardia Community College	MathStart@lagcc.cuny.edu
New York City College of Technology	MathStart@citytech.cuny.edu
Queensborough Community College	MathStart@qcc.cuny.edu

*Evening classes are slightly longer, but all Math Start programs complete before the start of the fall semester.

**Received a CUNY proficiency index score that indicates you need to meet proficiency in math.

Math Start will begin offering summer classes starting in May 2021

You will find college-specific class dates below. Calendar dates are subject to change. Please check with the Math Start contact at individual colleges to confirm.

	LaGuardia CC	Daytime: M-Th, 10:00am-4:00pm

What your week and daily schedule will look like

Math Start’s summer program is intensive because we are dedicated to helping you succeed in math. Students should be prepared to participate in class 4-days a week, working both online as a member of class, in small groups and individually. Students also participate in a series of college success seminars led by their Math Start advisor. Homework will be assigned to be done outside of class time. For more information on weekly schedules students should be prepared for, see details below:

3.5 hour schedules

- 2-3.5 hours of live online instruction with your teacher and classmates
- 0-1.5 hours of individual and small-group work (the remainder of the 3.5 hours not spent in live online sessions)
- A break of 15-30 minutes
- Additional time to complete homework assignments on your own time (plan for 1-1.5 hours per day)
- Math tutoring is also available outside of class hour

5 hour schedules

- 2.5-4 hours of live online instruction with your teacher and classmates, in 2 to 4 separate sessions
- 1-2.5 hours of individual and small-group work between the required live sessions
- A break of 30 minutes to one hour
- Additional time to complete homework assignments on your own time (plan for 1-1.5 hours per day)
- Math tutoring is also available outside of class hours
